DETAILED ACTION

Allowable Subject Matter

1. Claims 1-25, 47-58 and 74-85 are allowed.

Election/Restrictions

2. This application is in condition for allowance except for the presence of claims 26-46, 59-73 and 86-100 to Group II, non-elected without traverse. Accordingly, claims 26-46, 59-73 and 86-100 have been cancelled.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel claims 26-46, 59-73 and 86-100.

4. The following is an examiner's statement of reasons for allowance: The claims are allowable for at least the following reason. The claims detail generating a hierarchical class definition structure and naming structure from a plurality of verified event relationship rules for each event source and generating a plurality of event

Art Unit: 2127

management rules for each event type automatically from the event relationship network rules and the rule templates wherein the event relationship rules are verified to determine if they violate an event protocol. None of the cited prior art of record teach the cited generating steps as disclosed in the claims. Prior Art reference, "Event Relationship Network: A Framework for Action Oriented Analysis in Event Management" by Thoenen et al substantially discloses the invention, however, the cited reference has been disqualified as prior art based on the filed 1.131 affidavit of prior conception. U.S. Patents 6,629,106, 6,664,978, 6,272,537, and 6,779,120 at best teaches the dynamic generation of event patterns, i.e. event rules and relations. However, the cited references do not teach whether these patterns are verified, whether they are in a hierarchical class structure with a naming structure and allow for management patterns to be generated from other patterns. Therefore, the claims are allowable over the cited prior art of reference as detailed above.

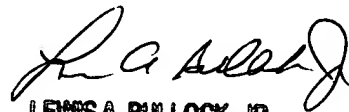

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
